

Location Intelligence

empowers insurance professionals to understand and manage risks across the organization – before, during, and after an event.

Benefits of the Solutions

- Increased efficiency and profitability
- Reduced fraud cases
- Faster decision making and more responsive claims support process.
- Reduced costs

Availability

The Apps can be downloaded from the Google and IOS Playstore

The Accident Reporter App

Insurers know that to be successful they must offer the products and services customers need at the right price. Insurance has a strong geographic component, from managing the addresses of policyholders to the location of risk to the logistics of handling claims. This is where GIS can benefit them the most.

The Challenge

Insurers not getting clear information on when, where and how an accident happened leading to slow claim process and fraud. GIS provides the following solution.

The Solution: Accident Reporter App

The app is designed to help policy holders report accident immediately it happens. The app picks the location and date of the accident automatically making it easy for the insurance to act by submitting details of the car (number plate), date and some description of the accident.

How it works

1. Policy holder **Downloads** app from playstore
2. Policy holder by submits details of the car (number plate), date and some description of the accident.
